

LED High Bay 50W		Item No: VO-HB-50 Power 50W Light Source: 50 Led's Luminous Flux 3240LM Input voltage 100-277VAC Colors WW/PW/CW Beam angle 60 degrees Life span >50,000 Hrs
LED High Bay 100W		Item No: VO-HB-100 Power 100W Light Source: 84 Led's Luminous Flux 6505LM Input voltage 100-277VAC Colors WW/PW/CW Beam angle 71 degrees Life span >50,000 Hrs
LED High Bay 150W		Item No: VO-HB-150 Power 150W Light Source: 126 Led's Luminous Flux 9652LM Input voltage 100-277VAC Colors WW/PW/CW Beam angle 84 degrees Life span >50,000Hrs

**Benefits:**

Instant on, no warm up time.

Does not use a ballast.

No risk of explosion.

No UV rays.

Improved light quality.

Reduced maintenance cost.

Reduces power consumption by 70% or more.

LED high bay lights can replace high pressure sodium lights and metal halide lights. By reducing power consumption by up to 70%, significant savings will be seen on monthly energy bills. The ability of LED lights to turn on instantly makes them compatible with lighting control systems which can reduce power consumption even further.
